STRAWBERRY PLAN
PRODUCTION INSURANCE DOCUMENT

Reporting Intended Acres

At the time of underwriting you must provide Agricorp with your intended acres and planting date for all day-neutral strawberries including crop not yet planted but expected to be harvested in the crop year.

Upon completion of planting, an Agricorp adjuster will visit your farm to validate your acreage and plant stand for insurance purposes. Any difference between your intended acres and the accepted final planted acres will be adjusted on your Strawberry Crop Underwriting Report. Any premium difference this may generate will either be refunded or collected.

Reporting yields

It is important to keep daily picking records for accurate yield reporting. Agricorp will accept harvested yield as part of your declared yield beyond the coverage period date, however any damage caused by insured perils after this date is not insurable.

Coverage period

Coverage for insured perils begins December 20 and ends when harvest is complete or the coverage period date is reached, whichever comes first.

Coverage dates for day-neutral varieties vary by area, depending on the available crop heat units and other specific geographical characteristics. Please review the map on the back of this page to verify the geographical area for your farm. If you are unsure of your coverage period date, contact Agricorp.

2019 Coverage Dates	
Area (see map)	**Coverage period date**
A, B and C	October 15
D	September 30
E	September 20

Winter Protection of Strawberry Patches:

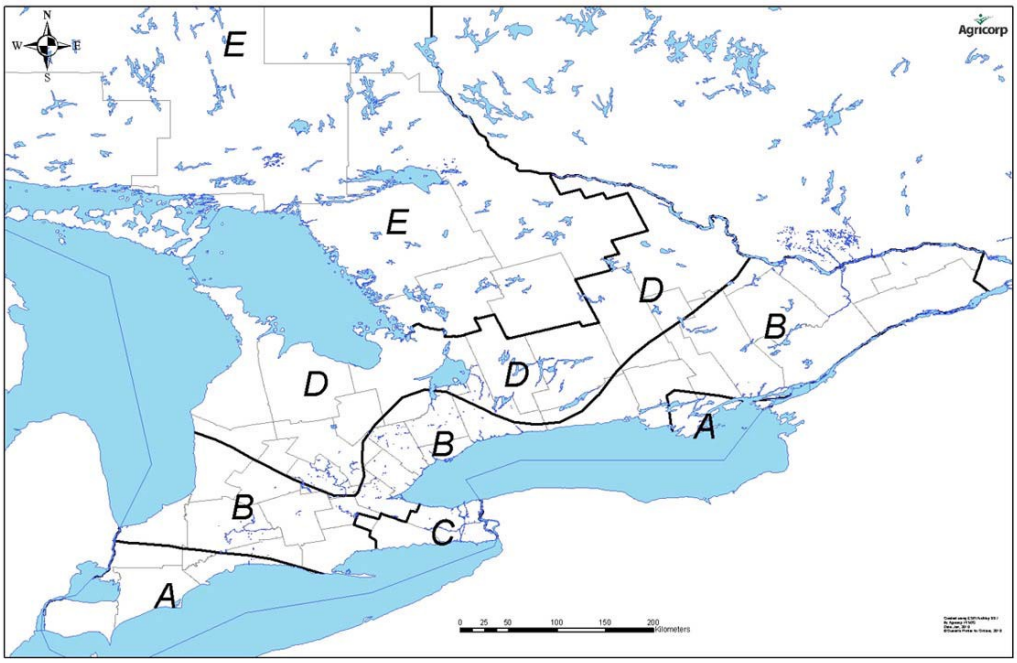
To maintain your coverage follow good farm management practices such as:

- The use of adequate protective mulch/row cover to prevent heaving and crown injury
- Selecting healthy plants that are virus tested, and disease and nematode free.
- Maintaining practices to prevent the spread of virus

To be eligible for winter coverage on first year plantings the following planting dates must be met:

2019 Eligibility Dates	
Area (see map)	**Coverage period date**
All areas June-bearing only	June 15
A and C	September 25
B (west)	September 15
D and B (east)	September 3
E	August 25

Defined Coverage Areas:



Areas C and E are defined by municipal boundaries, as follows:

Area C	Niagara and Haldimand County and Tuscarora Township
Area E	Northern Ontario, the districts of Algoma, Cochrane, Kenora, Manitoulin, Muskoka, Nipissing, Parry Sound, Rainy River, Sudbury, Thunder Bay, Temiskaming, and the county of Haliburton.

Source: This map defines five specific areas and has been developed by Agricorp based on: consideration of available crop heat units and other specific geographical characteristics.

For a complete list of perils and coverage details please refer to the *Contract of Insurance, Part XV – Strawberry Insuring Agreement.*

Errors and omissions excepted. Agricorp reserves the right to make corrections if there are any errors or omissions on this Production Insurance Document. For specific legal obligations of Production Insurance, please consult the *Contract of insurance*, *Terms and conditions*. For details on the collection of information and treatment of records, please refer to *Part I, Section I* of the contract.

***Production Insurance Documents (**PIDs) form part of the *Contract of Insurance* and are used in the interpretation of the *Contract of Insurance* and the determination of claims under the *Contract of Insurance*. Except where provided otherwise, each PID shall be in force for the crop year in respect of which it is made and shall continue in force for each crop year thereafter until it is cancelled, amended or replaced. All capitalized terms used in this PID shall have the meaning given in the *Contract of Insurance*.

Where there is any conflict between the provisions of a PID and the provisions of *Part I of the Contract of Insurance*, the provisions in the PID take precedence. Where there is any conflict between the provisions of a PID and the provisions of an Insuring Agreement of the *Contract of Insurance*, the provisions of the Insuring Agreement take precedence.
