

# 2020 Yield Declaration Instructions - Spring grain, canola, spring wheat, flax, oats, barley and mustard

This is your self declared yield reporting package for spring grain, canola, spring wheat, flax, oats, barley and mustard. Your winter barley and winter canola are also reported using this package.

When you have your yield information (weigh tickets, settlement statements, storage receipts, and on-farm storage measurements), follow these steps to calculate and report your yield:

1. Determine the amount of each crop that has been sold or that is stored at an elevator (and not yet sold).
2. Determine the amount that was fed to livestock.
3. Measure crop stored on farm in round and square bins, and estimate crop stored in gravity wagons (e.g., for seed). Please use an accurate test weight when calculating your yield stored on farm. You can weigh a sample bushel of grain at home, or take a sample to be weighed at your local elevator.
4. Record your bin measurements and yield on the enclosed *Yield declaration worksheet(s)*.
5. Report your yield as soon as possible and no later than October 31, 2020 using one of the four options below. If you are unable to harvest your crop by the deadline, call Agricorp to file a damage report and report a partial yield.

Phone: 1-888-247-4999  
 TTY 1-877-275-1380  
 Email: [contact@agricorp.com](mailto:contact@agricorp.com)  
 Fax: 519-826-4118  
 Mail: Agricorp  
 1 Stone Road West, Box 3660, Stn. Central  
 Guelph, ON N1H 8M4

Whichever option you choose, Agricorp will provide you with a confirmation number.

6. If your total yield is less than your total guaranteed production, complete and sign the enclosed *Proof of loss* form and return it to Agricorp.

**Note:** If you are reporting a yield grown under a landlord/sharecrop arrangement, please report the total yield from the total acres for each arrangement on the appropriate worksheet.

## 1 Determine crop sold and crop stored at elevator

1. Add up the weights from your settlement slips and storage receipts. For wheat, add up each grade separately. If you have weigh slips for wet weights only, please call Agricorp for assistance in converting to dry weights.
2. If the dry weight is measured in tonnes, multiply the number of tonnes by 36.7437 to convert to bushels for wheat, or by 2204.62 to convert to pounds for spring grain, mustard and canola.
3. Record the amount of sold crop and crop stored at an elevator in the space provided on the *Yield declaration worksheet*. For spring grain, please record the combined yield of barley, oats, and mixed grain.

## 2 Determine crop fed to livestock

1. Estimate the number of pounds fed to each animal in one day, then multiply that number by the total number of animals and the total number of days the crop was fed.
2. For wheat, convert pounds to bushels by multiplying the number of pounds by 0.0167. For example:

Number and type of animals	Pounds fed per animal per day	Number of days fed	Total pounds fed	Conversion to bushels	Total bushels fed	Grade
50 hogs	x 2.1lbs/hog/day	x 15 days	= 1,575 lbs	x 0.0167	= 26.3 bu	2

3. Write the amount of crop fed to livestock on the *Yield declaration worksheet*.

# 3a

## Measure crop stored in round bins

- Using the measurement key and diagrams, determine the following measurements (in feet) of crop stored in round bins.

Crop (Cone up)

Measurement key
A= The height of the crop in the bin, excluding any upward cone (in feet)
B= The height of the cone (in feet)
C= The circumference of the bin (in feet)

Crop (Cone down)

**Total height (H) = A + (B ÷ 3)**  
**Radius (R) = Circumference (C) ÷ 6.28**

**Total height (H) = A - (B ÷ 3)**  
**Radius (R) = Circumference (C) ÷ 6.28**

- Write the measurements for each bin in the storage measurement table on the back of the *Yield declaration worksheet*. Record the grade (for wheat only) and a test weight for all crops.
- Using these measurements and the formulas provided, calculate the amount of crop that is stored in round bins and write this number on the *Yield declaration worksheet*.

<b>For canola, mustard, and spring grain</b> Stored pounds = $R \times R \times 3.14 \times H \times \text{test weight} \times 0.8$	<b>For spring wheat</b> Stored bushels = $\frac{R \times R \times 3.14 \times H \times \text{test weight} \times 0.8}{60}$
--	---

# 3b

## Measure crop stored in square bins

- Using the measurement key and diagram, determine the following measurements (in feet) of any crop stored in square bins.

Measurement key
H = The height of the stored crop in the bin (in feet)
L = The length of the stored crop in the bin (in feet)
W = The width of the stored crop in the bin (in feet)

- Write the measurements for each bin in the storage measurements table on the back of the *Yield declaration worksheet*. Record the grade (for wheat only) and a test weight for all crops.
- Using these measurements and the formulas provided, calculate the amount of crop that is stored in square bins and write this number on the *Yield declaration worksheet*.

<b>For canola, spring grain and mustard</b> Stored pounds = $H \times W \times L \times \text{test weight} \times 0.8$	<b>For spring wheat</b> Stored bushels = $\frac{H \times W \times L \times \text{test weight} \times 0.8}{60}$
---	---

For specific legal obligations of Production Insurance, please consult the *Contract of insurance, Terms and conditions*. For details on the collection of information and treatment of records, please refer to Part I, Section I of the contract.

Errors and omissions excepted

# Yield declaration worksheet 2020 spring grain

Agricorp ID: \_\_\_\_\_ Customer name: \_\_\_\_\_  
 Total acres: \_\_\_\_\_ Landlord (if applicable): \_\_\_\_\_  
 Total guaranteed production: \_\_\_\_\_ Sharecropper (if applicable): \_\_\_\_\_  
 Print date: \_\_\_\_\_ Your share: \_\_\_\_\_

**Note:** To ensure the integrity of the Production Insurance program, Agricorp randomly selects yields for verification against accidental or willful misrepresentation. At a later date, we may review your yield declaration to verify the yield you reported. Keep this worksheet and all your bin measurements, settlement statements, receipts, and other supporting documents for at least six years.

## Record your yield of spring grain

Please use pen only	Spring grain Dry yield in pounds*
Crop sold and crop stored at elevator (not yet sold)	
Crop fed to livestock	
Crop stored in round bins	
Crop stored in square bins	
Crop stored in wagons (e.g., for seed)	
Report this total to Agricorp:	

\* Spring grain crops include winter barley, oats, barley and mixed grain. Mixed grain is any seed mixture that includes oats and barley representing at least seventy-five per cent of the total weight.

## Call Agricorp

When you have finished calculating your yield, simply call Agricorp at 1-888-247-4999. The final date to report your yield is **October 31, 2020.**

Please be ready to answer the following questions:

- How does this yield compare to your yields in recent years? (check one):  
 Above average  Average  Below average
- If your yield is below average, what was the cause of loss? \_\_\_\_\_
- How many acres did you harvest? \_\_\_\_\_  
 Total
- On what date did you finish the harvest? \_\_\_\_\_  
 mm dd yyyy
- Are any acres not harvested? \_\_\_\_\_
- What was your yield per acre? \_\_\_\_\_
- If you have on farm storage, did you obtain a sample test weight? \_\_\_\_\_

**Note:** Each year you build an average farm yield that reflects your production potential. Agricorp uses the yield you report to update this average. For customers who do not report their yield, Agricorp may substitute a yield value to establish the customer's average farm yield for 2021. Protect the equity you have built in your average farm yield by reporting your yield by October 31, 2020.

# Storage measurements

## 2020 spring grain

Please use this sheet to record the measurements of crop stored in round or square bins. For each bin, record a test weight.

 Round bins	Example	1	2	3	4	5
Circumference (C)	<b>60.2 ft</b>					
Height of crop, excluding upward cone (A)	<b>14.5 ft</b>					
Height and direction of cone (B)	<b>6 ft, up</b>					
Test weight	<b>40</b>					
Type of crop	<b>Mixed grain</b>					
Stored crop (lb)	<b>152,270</b>					

 Square bins	Example	1	2	3	4	5
Height (H)	<b>8 ft</b>					
Length (L)	<b>20 ft</b>					
Width (W)	<b>10 ft</b>					
Test weight	<b>40</b>					
Type of crop	<b>Mixed grain</b>					
Stored crop (lb)	<b>51,200</b>					

Estimate and record the amount of crop stored in wagons. Please include crop stored for seed. For each wagon, record the type of crop and a test weight.

 Wagons	Example	1	2	3	4	5
Test weight	<b>40</b>					
Type of crop	<b>Mixed grain</b>					
Estimated stored crop (lb)	<b>1,000</b>					

Please keep this document for your records.

Test weight	<b>52</b>					
Type of crop	<b>Flax</b>					
Stored crop (lb)	<b>66,560</b>					

Estimate and record the amount of crop stored in wagons. Please include crop stored for seed. For each wagon, record the type of crop and a test weight.

 Wagons	Example	1	2	3	4	5
Test weight	<b>52</b>					
Type of crop	<b>Flax</b>					
Estimated stored crop (lb)	<b>480</b>					

Please keep this document for your records.

## **Yield declaration kit**

Contact Agricorp  
to report your yields.

---

### **Yield reporting deadlines:**

Spring grain, canola, spring wheat, flax, oats, barley and mustard yields  
are due **October 31, 2020.**

Corn, soybean, white bean, coloured bean, and sunflower yields  
are due **December 15, 2020.**

#### **Importance of accurate and timely yield reporting**

Please report your yields by the deadlines above. Agricorp uses your reported yields to calculate your average farm yield (AFY), which determines your coverage. If you do not report your yields by these deadlines, Agricorp will apply a substitute yield. This can affect your AFY in future years for Production Insurance and any other programs that use AFYs.

If your harvest is not complete by the deadline, please file a damage report indicating the cause for the delay, report any partially harvested yields, and indicate how many acres remain to be harvested.
