2024 Information Sheet Fall-Seeded Grains and Oilseeds

Updates

Nearly half of farmers now report their acres online – have you tried it?

This past spring, more farmers than ever took advantage of the ease and speed of reporting online at agricorp.com/acreage. The deadline to report fall-seeded grains and oilseeds acres is **November 8**.

Are you taking advantage of pedigreed seed coverage?

Pedigreed seed production coverage offers a unique risk management option for farmers producing pedigreed seed winter wheat. This coverage includes a germination guarantee and a higher price option. Learn more at agricorp.com.

Rates

About premiums

Base premium rates for Production Insurance are set annually to reflect factors like past performance of the plan, changes to the claim price, and the level of the Ontario Agricultural Products Fund.

The federal and provincial governments pay up to 60% of the required premiums and 100% of the administration cost of delivering the program.

Calculating your premium

Premium = number of acres × base premium rate × (discount or surcharge)

Discounts and surcharges: If you have had Production Insurance coverage for a commodity for more than one year, your premium rate may be discounted or surcharged. For your own discount and surcharge information, see your renewal notice.
